

RC-38
MATERIAL REVIEW RECORD
INSPECTION DISCREPANCY AND CORRECTION RECORD
(IDCR)

Seller shall assure that all related Buyer Material Review (MR) records (Inspection Discrepancy and Correction Record (IDCR), Form 25-U-1) dispositioned by Material Review are included with each shipment of articles.

Seller shall present each IDCR to Buyer's Quality representative for review when source inspection is a requirement of the purchase order. Seller shall also present each IDCR to the cognizant Government representative for review when directed by such MR disposition or when Government source inspection is a requirement of the purchase order.

INFORMATION

The intent of this provision is to assure nonconformances requiring disposition by Material Review have been completed or the Buyer is positively informed when hardware is nonconforming. Furthermore, having a copy of each MR with each shipment enables all persons handling the affected hardware to have the required information available.
