

FLYSHEET X

NOTIFICATION TO SUPPLIER REGARDING BERYLLIUM OR BERYLLIUM COMPOUNDS

This Order requires the fabrication of articles composed in whole or in part of Beryllium or Beryllium compounds. The processing of Beryllium or Beryllium compounds may constitute a health hazard if adequate control measures are not employed. It shall be the sole responsibility of Seller to determine what control measures it will use to prevent injury to persons.

Available upon request from Buyer are copies of the procedures used by Buyer in processing Beryllium and Beryllium compounds in its own plant. Seller may wish to use this procedure as a guide for establishing Seller's own control measures. In the event Seller elects to follow Buyer's procedure, Seller should employ the services of a qualified expert to perform the functions assigned to Buyer's Safety, Health, and Environmental Affairs (SHEA) Department. It is suggested that Seller seek the assistance of state, county, or local health authorities in obtaining the services of a qualified expert.
