HS10: Hamilton Sundstrand Systems Requirements & Evaluation for Suppliers

HS10 defines the primary quality system requirements associated with the Hamilton Sundstrand Space Land and Sea (SLS) Supplier Tailored Enhancement Process (STEP) supplier certification effort, and includes a graduated scale by which compliance is assessed. HS10 requires the Contractor to develop, implement and document a quality system that will assure compliance with the requirements of the procedure.

The Contractor's quality system implementing the requirements of HS10 and the purchase order contract shall be made available for review, audit and approval or disapproval throughout the life of the contract.

Applicable sections and levels with HSM10 meet the intent of:

MIL-I-45208, MIL-Q-9858, ISO 9001, ISO 9002, ISO 9003, AS9100, ISO 14000, SSP 41173, NHB 5300.4(1D-2), MIL-STD-45662, ANSI/NCSL Z540, and ISO 17025.
