Attention: Quality Manager

Subject: Source Inspection Service – Pratt and Whitney Rocketdyne Inc.

Dear Pratt & Whitney Rocketdyne Supplier:

This letter is to notify you that on October 27, 2005 Boeing Source Inspection Support on behalf of Pratt and Whitney Rocketdyne Inc. (PWR) will cease. This means Boeing will not be accepting any calls for Pratt & Whitney Rocketdyne (PWR) Canoga Park procurements through the Automated Source Activity Planning (ASAP) system after October 27, 2005.

The new system that is being provided to suppliers is called “ASIRs” (Automated Source Inspection Request System). You will access the system the same way you do today through the CITIS gateway (Supplier Portal). The ASIRs program is user friendly and we don’t anticipate any usage problems. Should you encounter any difficulty, however, contact your PWR buyer for assistance.

Please complete the attached form so we can validate your supplier profile in the system. Please fax the form to (818) 586-0315 by October 31, 2005 to preclude any delay in obtaining Source Inspection.

An emergency Source Inspection hotline is also being made available for your use at: (818) 586-2790.

Sincerely,
